Software Engineer

At 13 years old I started developing private servers for Ragnarok Online. I fell in love with coding at first sight. Self-taught, I have worked with programming since 17. I'm passionate about technology, software development, and open source! I'm currently a Software Engineer, working mostly with Backend using Python[FastAPI], offering more than 3 years of experience in demanding environments focused on producing cutting-edge systems. I'm Well-organized and customer-focused. Motivated and experienced in working effectively in dynamic environments.

## STACKS

| | |
|---|---|
| **Back-end** | **Python**<br>**Node.JS** |
| **Database** | **MongoDB**<br>**PostgreSQL** |
| **Front-end** | **ReactJS**<br>**NextJS** |
| **Extras** | **Git**<br>**Rest**<br>**HTTP**<br>**Docker**<br>**Serverless**<br>**Messaging [RabbitMQ, SNS]** |

## PROFESSIONAL BACKGROUND

| | |
